

Scanner Option

For automatic reading of hard-copy questionnaires

Your fields of application

- Questionnaires of outgoing patients
- Staff satisfaction surveys
- Quality questionnaires aimed at social partners

3 reasons for choosing the Scanner Option

- **Speed:** More than 1,000 questionnaires read per day
- **Effective:** An automatic recognition level close to 100%
- **Flexible:** A user-friendly environment enabling to check the results

Function list

- Layout of the scanner form: insertion of images, text, arrangement of the questions, etc.
- Printing of the form for distribution.
- Creation of a PDF file for orders of copies to an external supplier.
- Reading of the hard-copy questionnaires.
- Possibility of checking and completing by text zones the automatic reading.
- Validation of the reading in order to launch an analysis of the results (see functions of Sphinx Survey software).

Features of the Fujitsu FI5120C scanner

(Scanner recommended and commercialised by Sphinx)

- Dual Interface – USB 2.0 and Ultra SCSI selectable.
- 50 page ADF sheet-feeder.
