

# Web'Reporting

Share your data!

## Your projects

- Implement a system of on-line reporting for sales staff.
- Distribute the results of surveys to your subsidiaries in a format that can be consulted on-line.
- Propose data analysis solutions that are directly accessible via the Internet.
- Offer a survey sponsor dynamic access to the results of Internet surveys.

## Our solutions

- Make the **Web'Reporting option available**, which enables building shared reporting applications via the Web on the SphinxOnline Manager platform.
- **Re-calculate the results in real-time** according to the collected data.
- **Manage access rights to reports** for complete and controlled sharing of results.
- **Carry out** an analysis of every data file type: Sphinx surveys, Excel files, Access DB, etc.

## Function list

- **Building of consultation and analysis interfaces: sorting by single and multiple criteria, multiple charts, calculation of profiles, export to office tools: you choose the possibilities of interactivity.**
- **Defining user access rights ( identifier / password authentication).**
- **Displaying scorecards built from the Sphinx software.**
- **Exporting results to standard office tools (PDF, Word, Excel).**
- **Distributing access via e-mail.**
- **Reporting on a Sphinx survey or external database.**
- **100% ASP with no software installation.**

Enlightening your decisions!
